ABOUT ME

Final-year Bachelor of Science (Honours) in Information Technology undergraduate at the University of Moratuwa with hands-on experience in full-stack development and industry exposure through an internship at ZynovateX (Pvt) Ltd. Proficient in React.js, Next.js, Spring Boot, Node.js (NestJS, Express), and databases including PostgreSQL and MongoDB. Experienced in designing and developing scalable, secure, and user-friendly web applications using clean architecture principles. Passionate about building efficient software solutions and continuously improving technical and problem-solving skills in real-world environments.

EXPERIENCE

ZynovateX (Pvt) Ltd.

Intern Software Engineer (Full Stack)

01/2025 – 07/2025

Freelance Full-Stack Developer & Graphic Designer (Fiverr & Upwork)

Developed full-stack web applications and graphic design solutions for international clients using the MERN stack, Next.js, and modern design tools.

2021 – 2025

EDUCATION

Bachelor of Science Honours in Information Technology (BScHons (IT)) (Undergraduate)

Faculty of Information Technology- University of Moratuwa
Current GPA: 3.39

2022 – Present

G.C.E Advanced Level

Anuradhapura Central College

2018

TECHNICAL SKILLS

Frontend

React.js, Next.js, Tailwind CSS

Programming Languages

Java, Python, C

Backend

Spring Boot, Node.js (Express.js, NestJS)

Databases

PostgreSQL, MongoDB, MySQL

Tools & Technologies

Docker, Git, REST APIs, JWT Authentication, AWS S3, Stripe, Electron.js

UI/UX Design

Figma, Adobe XD

PROJECTS

MergeX - Recruitment Hiring Management System-(Second-Year Software Project – 99x)

Tech Stack: MERN Stack(React.js, Express.js, MongoDB, Node.js)

- Collaborated within a 5-member agile development team
- Developed a full-stack application using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Implemented candidate profile creation, CV upload, and online job application functionalities
- Designed recruitment workflow features including interview scheduling, candidate evaluation, and hiring management
- Enabled recruiters and interviewers to manage candidate assessments and assign interview scores
- Developed admin functionalities for managing users, roles, and overall system activities

- Streamlined recruitment and hiring processes through an integrated digital platform

SlotGo (Vehicle Parking System)

Tech Stack: React.js, NestJS, PostgreSQL

- Developed a full-stack smart parking management system with Admin, Counter, and Customer roles.
- Implemented QR-based parking ticket generation and real-time parking time and cost tracking.
- Enabled counter staff to issue and manage parking tickets efficiently.
- Built an admin dashboard for parking slot and revenue management with automated pricing calculations.
- Improved parking operations with overdue penalty handling and a counter management system.
- Designed a responsive UI using Tailwind CSS and integrated secure JWT authentication.

LapLanka - Online Laptop Sales Platform-(Enterprise Application Development (EAD) Project)

Tech Stack: MERN Stack(React.js, Express.js, MongoDB, Node.js)

- Built a full-stack e-commerce platform using the MERN stack and microservices architecture
- Designed independent microservices for product management, user authentication, order handling, and payment processing
- Integrated Stripe payment gateway for secure online transactions
- Implemented AWS S3 cloud storage for secure image and media management
- Developed separate customer and admin portals for efficient platform management
- Improved scalability, maintainability, and service isolation through microservices-based system design

LivingTeak – Furniture E-Commerce Web Application

Tech Stack: Next.js, MongoDB

- Developed a modern furniture e-commerce web application using Next.js and MongoDB
- Implemented responsive and user-friendly UI for seamless customer experience across devices
- Developed an admin panel for managing products, orders, and website content.
- Integrated Cloudinary for secure cloud-based image storage and optimization
- Deployed the application using Vercel with serverless hosting architecture
- Developed dynamic product browsing, category filtering, and inventory management functionalities
- Live Project: www.livingteak.com 

ERP System (Garment)

Tech Stack: React.js, Spring Boot, PostgreSQL, Docker,

- Designed and developed a role-based ERP system for garment production management with Admin, Manager, and Worker roles
- Implemented modules for inventory management, production tracking, and task assignment
- Designed and managed relational databases using PostgreSQL
- Implemented JWT-based authentication and authorization for secure access control
- Containerized application using Docker for consistent deployment

Smarty Menu-QR-Based Restaurant Ordering System

Tech Stack: React.js, Node.js, MongoDB, Electron.js

- Developed a QR-based ordering system using React.js, Node.js, and MongoDB.
- Enabled customers to scan QR codes and place food orders directly from their mobile devices.
- Built a desktop admin dashboard using Electron.js.
- Enabled real-time order management and menu updates.

VOLUNTEERING EXPERIENCE

Faculty of Information Technology, University of Moratuwa

2023 – 2024

Level 2 Batch Representative for the batch 21

FIT Moments

2024 – 2025

Assistant Head of Creative Design Pillar
